INDEX.

PAGE

ALLARDICE, R. E.

On the barcentric calculus of Möbius, - - - 2

On the contact-property of the eleven-point conic, - 37

On a surface of the third order, - - - 59

ANDERSON, R. E.

The plane triangle ABC : intimoscribed circles, etc., - 70

GIBSON, GEORGE A.

Integrals of the form

$$\int_0^{2\pi} \log\left\{(x - a\cos\theta)^2 + (y - b\sin\theta)^2\right\} \begin{matrix}\cos \\ \sin\end{matrix} m\theta . d\theta$$

and allied integrals, - - - - 83

KNOTT, PROFESSOR C. G.

Experimental introduction to the study of magnetism, 50

M'COWAN, JOHN.

On the solution of non-linear partial differential equations of the second order, - - - 63

MACKAY, J. S.

Matthew Stewart's Theorem, - - - - 90

MORRISON, PROFESSOR J. T.

On electrolysis [Title], - - - - - 34

OFFICE-BEARERS, - - - - - - 1

PEDDIE, WILLIAM.

Deduction of the thermodynamical relations, - - 41

PRESSLAND, A. J.

On the history and degree of certain geometrical approximations, - - - - - 23

PAGE

STEGGALL, PROFESSOR J. E. A.

Note on an approximate fractional expression for the expansion of $(1+x)^n$ to any odd number of terms, 21

On the smallest number of entries necessary in a table of logarithms to seven decimal places, - - 35

On lines of magnetic force, - - - - 44

Note on a property of a quadrilateral, - - - 94

Note on a possible definition of a plane [Title], - 95

TWEEDIE, CHARLES.

On the relation between the stereographic projections of points of a plane related to one another by inversion, - - - - - - 46
